

Puzzle I

Substitution Cipher

The method used for this puzzle is that of *substitution*, where data is replaced by another. For example, in the **decoder** provided the number 1 would be substituted for the character B. The character B could also be substituted for the number 1.

In Final Fantasy the AI Bhed speak their own 'language' which is really just a substitution cipher of English. Substitution ciphers do not have to be alphabet letters but can be any image, as in one of the Sherlock Homes stories – The Adventure of the Dancing Men.

Use the decoder and ciphertext below to recover the message.
