

Puzzle II

Transposition Cipher

The method used for this cipher is that of transposition, where data is moved around to hide the message.

In this puzzle you need to order the text into a matrix (writing the text across the columns) and then order the columns until the message is recovered when read down the columns from left to right. HINT: The top row of the matrix is a superhero.

Ciphertext

NOARMINOERKVVTTNATBIOOMROUDNRACTIEYTNRHLPSEETOTPUAITWARICRHEROT

Your Answer

Order the ciphertext

| | | | | | | |
|--|--|--|--|--|--|--|
| | | | | | | |
| | | | | | | |
| | | | | | | |
| | | | | | | |
| | | | | | | |
| | | | | | | |
| | | | | | | |
| | | | | | | |
| | | | | | | |
| | | | | | | |
| | | | | | | |

Sort the columns and write down the plaintext
